

Capstone Project

Part 3: Lessons Learned Report:

Team Members: Sreevidya Rotte (sr3229)

Nikhil Katiki Reddy (nk626)

During the project, we have encountered a difficulty with the dates. The order date was in “DD/MM/YYYY” date format but we needed it in “MM/DD/YYYY” date format. We could not be able to proceed with the same data set. So, we tried changing the format to MM/DD/YYYY but could not make it and did not understand the reason too. Then, we have deleted the dates and generated the random dates for our project in the necessary format. The random dates were in the range 1/1/2015 to 1/1/2017. This helped us in proceeding to the next steps and completing our part 2.

Also, we have deleted the ship dates from our data set as we did not use them anywhere in our project.

If I had a chance to choose another data set then I would try to choose the data set that has the “MM/DD/YYYY” date format.
